Chrostek reviewed the financial reports. In response to a question Young reviewed the process for new hook ups; noting that historically QLife had very little attrition and did not pursue extension of contracts, the contracts automatically turned into month to month agreements.

In response to a question regarding the additional loan payment, Mobley said that is was in the budget, no motion was required to proceed. Young said the additional payment would be made.

There was some discussion regarding fiber to the home, resulting in the conclusion it did not fit the current model for QLife.

Amery reported that the core Bisector Redundancy project was complete. He showed a drawing and that he would provide a copy to Young for the files. Amery reported there were some customers left to connect, date unknown at that time.

Larson asked if this insured true redundancy to which Amery said yes, the spurs could have issues, however the main core was secure.

The meeting ended at approximately 1:15 p.m.

Next Meeting:

Reports

Strategic Plan – Mobley handed out the document that was created as a result of the meetings held on the strategic plan. The next meeting was scheduled for March 21, at which time the plan will be approved. Ahier asked if this group has any alignment with Klickitat County and their broadband plan. Mobley would check. Young reported that he had attended a meeting with the Klickitat County group and we were further along with broadband. Mobley requested that comments be directed to him before the March 21 meeting.

Wi Fi Project – Young reported that there had been a “Cable Cutting” at the Discovery Center for that portion of the project. The remaining portions, Kramer Fields, Riverfront Park and Sorosis Park, were scheduled for completion in 30-60 days.

Ahier reported that he was talking with the Civic regarding doing similar project on a smaller scale. Amery reported that QLife fiber is at the Civic.

There was some discussion regarding making the Wi Fi splash page a little splashier –more interesting.

Aristo Operational Management Report –Amery reported that his vendor had discontinued the line of switches, he had to research new ones that would be compatible - the modules were promised by June. In response to a question Amery said the

switches weren't necessary for completion of the Bisectory/Redundancy project. Young clarified that the adjustments we need are in the future, so let's hold that over into the next fiscal year.
